

Success Story

Inspired Flight Technologies

Hardware Manufacturing

Inspired Flight Technologies, Inc. is a United States-based manufacturer of commercial small unmanned aerial vehicles and systems. Through the Cal Poly CIE SBDC the company was connected with mentors, advisers, and Cal Poly professors who provided advice on how to establish the operational framework necessary for our company to grow.

SBDC Assistance

Operations Planning and Control System

Operations planning

Production planning

Economic Impact

\$1.2M in funding

7 jobs created

“This combination was invaluable to our team, and accelerated our early growth.”

- Marc Stollmeyer
Founder of Inspired Flight Technologies
